Biography

The Carpenters began their missions journey in 2004 under the AIM program. As pioneering missionaries, they have served in every imaginable organizational function. They have worked with multinational teams comprised of American missionaries, regional missionaries, and national leaders to see more than twenty cities in five unreached nations opened to the gospel. Through miraculous victories and challenging setbacks, they have seen God's hand direct and lay out a path of revival. In 2024, they felt directed by God to go to the nation of Albania and pioneer an Apostolic work in that country.
